

AVIA EYAL

Senior Product Designer

aviaeyal@gmail.com | Tel Aviv, Israel | [linkedin.com/in/aviaeyal-417225107](https://www.linkedin.com/in/aviaeyal-417225107)

Senior Product Designer with 10+ years at a B2B SaaS company (SMB), spanning QA engineering, QA automation, and product design. A career trajectory that combines deep technical understanding with design craft, bringing systems thinking, data fluency, and cross-functional ownership to every product problem. Dual background in neuroscience (Tel Aviv University) and visual communications (Bezalel Academy of Art and Design).

SKILLS & TOOLS

Figma · Product Design · UX Strategy · User Research · Information Architecture
Competitive Analysis · Data Analysis (Mixpanel) · Design Systems · React (frontend contributions)
Cross-functional Leadership · Illustration · Prototyping · UX Writing

EXPERIENCE

HoneyBook | Tel Aviv, Israel

B2B SaaS platform for client management, payments, and document creation for service-based small businesses.

Senior Product Designer

Feb 2025 – Present

Product Designer

Jul 2022 – Feb 2025

- Co-authored the executive-level product strategy and a system-level design framework (architecture, block registry, capability rules) used by Product, Design, and Engineering as the single source of truth for all editor decisions
- Conducted competitive audits across major product initiatives — benchmarking patterns, identifying gaps, and using findings to inform design direction
- Designed multiple product-wide migration flows (renaming, re-mapping, and onboarding existing users to a restructured core feature), including UX copy, multi-state modals, and edge case handling
- Led multiple rounds of user research with power users and external consultants to validate product direction and surface usability issues before launch
- Built analytics dashboards to investigate navigation patterns, segmented by user lifecycle stage — insights directly shaped information architecture decisions
- Contributed frontend code via merged pull requests — copy fixes, layout corrections, and component adjustments in a React codebase
- Designed core features across the company's documents and templates product area, including a template gallery, search and discovery flows, and a WYSIWYG document editor
- Designed project-level features including custom fields, payment status indicators, and entity hierarchy navigation
- Collaborated with the design system team on component migrations, empty states, and pattern governance
- Created product illustrations and owned the illustration system end-to-end — defined the visual direction, built the production pipeline, and coordinated an external illustrator's priorities with the design team
- Worked cross-functionally with product management, user research, engineering, data analytics, and marketing

Senior QA Automation Engineer

Mar 2018 – Jul 2022

- Led QA automation strategy and infrastructure for the product engineering organization

- Began formal transition into product design — studying visual communications at Bezalel Academy while working full-time
- Built and maintained automated test frameworks supporting continuous delivery across the platform

QA Engineer

Feb 2017 – 2018

- Manual and automated quality assurance across web and mobile products

ironSource / Supersonic | Tel Aviv, Israel

Mobile monetization and marketing platform.

QA Engineer

Jan 2016 – Feb 2017

- End-to-end quality assurance for SDK integrations and ad-serving systems

Tel Aviv University

Research Assistant

Aug 2013 – Feb 2014

- Neuroscience research during undergraduate studies

E D U C A T I O N

B.A., Design and Visual Communications

2019 – 2023
